

Review of Homework-2 (Group-3)

Group 1

1 problem1

1.1

This looks correct, but I think we can use the Human Activity Recognition Using Smartphones dataset to at least calculate the upper bound of C .

1.2

Again I think a small L for f_i can be calculated, as a function of λ at least.

1.3

This looks correct to me.

2 problem2

No middle steps.

3 problem3

Looks great, nice proof.
